

# SEI Emerging Markets Debt (CT 1)

Fact Sheet / July 31, 2024

## Investment Strategy

The Emerging Markets Debt Fund, (the "Fund") is a collective trust that seeks maximize total return. The Fund will invest at least 80% of its net assets in fixed income securities of emerging market issuers. The Fund will invest in debt securities of government, government-related and corporate issuers in emerging market countries, as well as entities organized to restructure the outstanding debt of such issuers. The Sub-Advisers will spread the Fund's holdings across a number of countries and industries to limit its exposure to a single emerging market economy and may not invest more than 25% of its assets in any single country.

### Collective Investment Trusts

SEI Trust Company (the "Trustee") serves as the Trustee of the Fund and maintains ultimate fiduciary authority over the management of, and the investments made, in the Fund. The Fund is part of a Collective Investment Trust (the "Trust") operated by the Trustee. The SEI Core Strategies Collective Trust is a trust for the collective investment of assets of participating tax qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The SEI Core Strategies Collective Trust is managed by SEI Trust Company, the Trustee, based on the investment advice of SEI Investments Management Corporation, the investment adviser to the Trust. As a bank collective trust, the SEI Core Strategies Collective Trust is exempt from registration as an investment company.

Holdings are subject to change.

## Credit Quality - (ex-cash) (% of portfolio)

The credit quality of a fund's holdings is derived using Standard & Poor's as the ratings source. The purpose of the ratings is to provide investors with a simple system of gradation by which relative creditworthiness of a fund's securities may be noted. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest).

## Regions - (ex-cash) (% of portfolio)

## Risk Information

There are risks involved with investing including loss of principal. There is no assurance that the objectives of any strategy or fund will be achieved or will be successful. No investment strategy, including diversification, can protect against market risk or loss.

Current and future portfolio holdings are subject to risk. Bonds and bond funds are subject to interest rate risk and will decline in value as interest rates rise. High yield bonds involve greater risks of default or downgrade and are more volatile than investment grade securities, due to the speculative nature of their investments. The Fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. The fund is non-diversified.

## Glossary and Important Information

**30-day SEC Yield:** An annualized yield based on the most recent 30 day period and includes any principal value changes to TIPS securities to reflect changes in the government's official inflation rate. Changes in the inflation rate can cause the fund's yield to vary substantially from one month to the next. An extraordinarily high SEC yield may be attributable to a rise in the inflation rate, which might not be repeated. The unsubsidized 30-day SEC Yield is an approximation illustrating the effect to the 30-day SEC Yield if fees were not waived during that period.

**Effective Duration:** Duration is a measure of a security's price sensitivity to changes in interest rates. Specifically, duration measures the potential change in value of a bond that would result from a 1% change in interest rates. The shorter the duration of a bond, the less its price will potentially change as interest rates go up or down; conversely, the longer the duration of a bond, the more its price will potentially change.

**Weighted Average Life:** The average number of years for which each dollar of unpaid principal on a loan or mortgage remains outstanding.

For those SEI products which employ a multi-manager structure, SIMC is responsible for overseeing the sub-advisers and recommending their hiring, termination, and replacement.

The SEI Core Strategies Funds are collective trust funds not mutual funds. Collective trust funds are only available to qualified retirement plans and eliminate many of the administrative costs associated with retail and institutional mutual funds. A collective trust fund is exempt from SEC registration as an investment company under the Investment Company Act of 1940. The SEI Core Strategies Funds are managed by SEI Trust Company (STC), the trustee, based on the investment advice of SEI Investments Management Corporation (SIMC). STC and SIMC are wholly owned subsidiaries of SEI Investments Corporation. For more information on the collective trust funds, including fees and expenses, please read the disclosure document for the trust.

The Emerging Markets Debt Blended Benchmark is a composite composed of 50% JP Morgan GBI Emerging Markets Global Diversified Index and 50% JP Morgan EMBI Global Diversified Index. The JP Morgan GBI Emerging Markets Global Diversified Index is a total return, unmanaged trade-weighted index for U.S. - dollar-denominated emerging-market bonds, including sovereign debt, quasi-sovereign debt, Brady bonds, loans and Eurobonds. The JP Morgan EMBI Global Diversified Index tracks the performance of external debt instruments (including U.S.-dollar-denominated and other external-currency-denominated Brady bonds, loans, Eurobonds and local market instruments) in the emerging markets.
