

# SEI Target Date 2065 Fund

Fact Sheet / September 30, 2025

## Investment Strategy

The Fund is a collective trust designed for investors that expect to retire in the years 2063 or later. It invests primarily in a combination of SEI Funds as defined in the Declaration of Trust, according to SEI's asset allocation strategy. SEI Funds are managed by external, independent, professional money managers selected, monitored and replaced by SEI Investments Management Corp. Those managers invest in U.S. and/or foreign common stocks, U.S. and/or foreign investment grade fixed income securities, U.S. and/or foreign non-investment grade fixed income securities, securities of real estate companies, and cash instruments. An investment in a target date fund is not guaranteed and may lose value before, during and after the target date.

### Collective Investment Trusts

SEI Trust Company (the "Trustee") serves as the Trustee of the Fund and maintains ultimate fiduciary authority over the management of, and the investments made, in the Fund. The Fund is part of a Collective Investment Trust (the "Trust") operated by the Trustee. The SEI Target Date Collective Trust is a trust for the collective investment of assets of participating tax qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The SEI Target Date Collective Trust is managed by SEI Trust Company, the Trustee, based on the investment advice of SEI Investments Management Corporation, the investment adviser to the Trust. As a bank collective trust, the SEI Target Date Collective Trust is exempt from registration as an investment company.

## Fund Details

Total Net Assets	\$573,000.00
Share Class	CT 1
CUSIP	78413J774
Inception Date	July 31, 2025
Expenses Before Waivers	0.44%
Expenses After Waivers*	0.44%

\* Fee waivers are voluntary and may be discontinued at any time.

## Strategy Allocations

- SIIT World Equity Ex-US - 27%
- SIIT U.S. Equity Factor Allocation - 16%
- SIIT S&P 500 Index - 13%

## Strategy Breakdown: Underlying SEI Fund Allocations and Top 5 Sub-Advisors

The Target Date Funds use SEI Funds and third party funds to meet their target asset class allocations. Each SEI Fund is composed of specialized managers that invest in distinct sectors of the markets. The use of specialist managers reflects SEI's view on the value of diversification across and within asset classes.

<sup>1</sup> Because LSV is an affiliate of SEI, a Fund's shareholders would have to approve the hiring of LSV.

<sup>2</sup> Credit Suisse Asset Management, LLC manages a wholly-owned subsidiary of the Fund.

The money managers listed are subject to the Fund's board approval. Subject to the approval of the Funds' Board of Trustees, SEI has the right to hire or terminate a money manager within an SEI fund at any time and without shareholder vote.

This table presents the historical performance of the securities comprising the current portfolio. This performance is not the performance of your firm, and should not be construed as reflecting advice provided by your firm. Information on historical allocations among funds, reallocations and strategy changes is available upon request.

Unless otherwise noted, fee waivers are voluntary and may be discontinued at any time.

Performance data quoted is historical and past performance does not guarantee future results. Current performance may be higher or lower. Performance current to the most recent month end can be obtained by contacting your SEI Representative. The principal value and investment return of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original value.

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. The prospectus and, if available, the summary prospectus contain this and other important information about the funds.

## Glossary and Disclosures

The SEI Target Date Funds are collective trust funds not mutual funds. Collective trust funds are only available to qualified retirement plans and eliminate many of the administrative costs associated with retail and institutional mutual funds. A collective trust fund is exempt from SEC registration as an investment company under the Investment Company Act of 1940. The SEI Target Date Funds are managed by SEI Trust Company (STC), the trustee, based on the investment advice of SEI Investments Management Corporation (SIMC). STC and SIMC are wholly owned subsidiaries of SEI Investments Company. **For more information on the collective trust funds, including fees and expenses, please read the disclosure document for the trust.**

**Risk Disclosure:** There are risks involved with investing including loss of principal. There is no assurance that the objectives of any strategy or fund will be achieved or will be successful. No investment strategy, including diversification, can protect against market risk or loss. No Investment Strategy or management technique can guarantee returns or eliminate risk in any market environment. Diversification does not protect against market risk or loss.

The principal balance of the portfolio may be depleted prior to a portfolio's target end-date and, therefore, distributions may end earlier than expected. This risk increases if the distribution amount chosen is a significant portion of the starting principal. The target date represents the respective date when an investor intends to withdraw funds for retirement. Principal of the SEI Target Date Funds is not guaranteed at any time, including the target date. The projected time periods do not take into account the payment of fees to the advisor out of the portfolio or any other additional distribution from the account.

The following risks may apply to the underlying investments:

- › **International:** International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations.
  - › **Small Cap:** Narrowly focused investments and smaller companies typically exhibit higher volatility.
  - › **Emerging Markets:** Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume.
  - › **Bonds:** Bonds and bond funds are subject to interest rate risk and will decline in value as interest rates rise.
  - › **High Yield Bonds:** High-yield securities may be more volatile, be subject to greater levels of credit or default risk and may be less liquid and more difficult to sell at an advantageous time or price to value than higher-rated securities of similar maturity.
  - › **TIPS:** TIPS can provide investors a hedge against inflation, as the inflation adjustment feature helps preserve the purchasing power of the investment. Because of this inflation adjustment feature, inflation protected bonds typically have lower yields than conventional fixed rate bonds.
  - › **Multi-Asset Funds:** Investing in Multi-Asset Funds is subject to the risks of the underlying funds. Asset allocation may not protect against market risk. Due to their investment strategies, the Funds may buy and sell securities frequently. The use of leverage can amplify the effects of market volatility on the Fund's share price and may also cause the Fund to liquidate portfolio positions when it would not otherwise be advantageous to do so in order to satisfy its obligations.
  - › **Dynamic Asset Allocation Fund:** Due to its investment strategies, the Fund may buy and sell securities frequently. The use of leverage can amplify the effects of market volatility on the Fund's share price and may also cause the Fund to liquidate portfolio positions when it would not otherwise be advantageous to do so in order to satisfy its obligations. Commodity-linked investments and derivatives may be more volatile and less liquid than direct investments in the underlying commodities themselves. Commodity-related equity returns can also be affected by the issuer's financial structure or the performance of unrelated businesses. The Fund's use of futures contracts, forward contracts, options and swaps is subject to market risk, leverage risk, correlation risk and liquidity risk. With short sales, you risk paying more for a security than you received from its sale. Short sales losses are potentially unlimited and the expense involved with the shorting strategy may negatively impact the performance of the fund.
